LEMON OIL POLISH is an excellent rejuvenator for fine wood furniture and has been widely used by professionals in piano and furniture repair and refinishing shops as well as personnel entrusted with maintenance of churches, offices and institutional furniture. This product cleans by removing soil, old wax build up, dust and debris which can stain, darken , and dull the surface of wood and stainless steel.

STAINLESS STEEL: Use this product to remove dirt, fingerprints and smudges from brushed or highly polished stainless steel surfaces. Use sparingly. Pour a small amount of polish onto a soft, slightly dampened, lint-free cloth. Rub entire surface with cloth until all dirt has been removed. Allow to remain on surface for a few minutes then rub briskly with a clean, dry cloth. This will buff the surface to a high gloss and leave no oily residue to attract dust.

WOOD FURNITURE & PANELING: Even sealed wood loses its natural moisture and luster due to age, heat and repeated waxing. This product will restore the moisture due to its compatibility with the natural wood oils. Apply in the same manner as for stainless steel, buffing in the same direction as the wood grain. Wood tones are highlighted, deep luster is obtained, and wood is protected from further damage.

DUSTING & MOP TREATMENT: Apply sparingly to dust cloths and mop heads. Allow product to penetrate into all fibers. Use treated cloth and mops for usual maintenance of floors, furniture, paneling and other objects. Dust mop heads and dust cloths must be retreated with product after laundering.

CAUTION: Keep out of reach of children. Contains petroleum distillates. Do not ingest. If this occurs, do not induce vomiting. Contact physician. Do not store or use near heat or open flame. Keep container sealed when not in use. Dispose of container in authorized landfill site.
