

HANG TIME

HIGH FOAM INDUSTRIAL CLEANER

- *Rich, Thick, Stabilized Foam
- *100% Biodegradable
- *Free Rinsing, No Soap Film
- *Pleasantly Scented
- *Skin Conditioners

CAUTION: Keep out of reach of children. Do not take internally.

32B43 NET CONTENTS GALLON(S)

This new formula consists of 100% biodegradable, synthetic detergents, special rinse additives, and emollients. This detergent dissolves food matter and emulsifies grease and oils. The emollients in this product will leave the skin soft and conditioned. This product is equally effective in hard water areas and may be used to clean heavily soiled areas. Yet it is so mild to the skin that it will not chap or irritate. Can be used in combination with bleach and most sanitizers.

DIRECTIONS:

Dilute 1 gallon of Hang Time and 1 gallon of 15% Industrial Bleach into 20 gallons of water. Apply with PIC's Foam-O-Matic.

Dilution rate may vary according to degree of soiling and type of surface to be cleaned. Average dilution is 1:15. Spray onto surface with a foamer, agitate for stubborn soil. Allow to penetrate layers of debris, then rinse. Do not allow foam to dry on surface. Rinse well to avoid re-depositing emulsified matter onto cleaned surface.

CAUTION: If taken internally, drink large amounts of water. If splashed into eyes, flush with water for 15 minutes. For skin contact, rinse with water. Avoid freezing. Rinse empty container before disposal in authorized landfill site.
