

BLUE SHOWER PARTS WASHER

SOLVENT FOR RECIRCULATING PARTS WASHER

- *145' Flash Point
- *Low Odor, Non-Noxious Fumes
- *Corrosion Inhibitor
- *Economical

CAUTION: Keep out of reach of children. Combustible.
Keep away from heat, spark or open flame.

45B62 NET CONTENTS GALLON(S)

This solvent compound is specifically formulated for use in circulation system parts washer equipment. This product provides an economical and effective method for cleaning metal parts while being gentle on the hands. Grease, oil, dirt, sludge, grime, ink, light carbon and similar soils are dissolved after only a few minutes of soaking and brushing. Machine shops, garages, factories, industrial repair shops and automobile make ready facilities will find this product to be an ideal compound for use in their recirculating parts washer units.

DIRECTIONS FOR USE:

For optimum results, it is suggested that the filter in the parts washer unit be changed in accordance with the equipment manufacturers recommendation. To extend solvent tank life, brush away loose dust and debris from parts before immersion in solvent. Spray solvent onto parts which are to be cleaned, allow to soak for a few minutes, brush surface with brush and rinse with clean parts cleaner solvent. Blow dry with compressed air, wipe dry with shop cloth, or allow to air dry. This product contains inhibitors to reduce occurrences of flash rusting. Replace with fresh parts cleaner solvent when needed.

CAUTION: Keep this product out of reach of children. Product contains petroleum solvents. Use only in a well ventilated area. Do not use, store or expose product to heat, spark or open flame. Store product in a cool dry location in original shipping container. Keep container sealed when not in use. Dispose of empty container in authorized landfill area. **FIRST AID:** If swallowed do not induce vomiting. Contact physician immediately. For eyes, flush with water for 15 minutes and seek medical treatment if irritation persists.
