

# FORMULA 50 CORROSION INHIBITOR

## **CORROSION & SCALE INHIBITOR**

- \*Nitrite/Borite/ Co Polymer
- \*Non Chromate Formula
- \*Protects Iron, Steel, Copper and Brass
- \*Protects Non Ferrous Metals
- \*Works Well in Glycol Formulas
- \*Not Recommended for Steam Boilers

**CAUTION:** Keep out of reach of children. Harmful or fatal if swallowed

**50B54      NET CONTENTS      GALLON(S)**

Formula 50 Corrosion Inhibitor is a highly effective scale and corrosion inhibitor that protects closed loop hot and cold water systems from scale, rust and corrosion. This product employs the latest technology using Nitrites, Borites and Co Polymers instead of Chromate. It is also effective when in water systems or antifreeze systems. This product is a highly concentrated and has a long service life.

### **DIRECTIONS:**

Formula 50 Corrosion Inhibitor can be added to the closed loop system at a rate of 11,000 to 12,000 ppm. (Approximately 10 gallons per 1000 gallons in the system) Maintain a residual of 800 to 1000 ppm in system. Check for presence of Nitrates in system by using a Nitrite drop test kit. Maintain pH at 9.5 to 11.

**CAUTION:** Harmful or fatal if swallowed. Avoid excessive exposure of concentrated product to skin or eyes. Store at room temperature.
