70B01 NET CONTENTS GALLON(S)

This product is a state of the art formula consisting of surfactants, wetting agents, water softeners and rinse additives. This product is specifically designed for use with pressure washing equipment for rapid, effective, and economical cleaning of cars, trucks, buses, mobile homes, campers and boats.

DIRECTIONS:

Dilution varies according to the degree of surface soil, amount of sudsing desired, and temperature and pressure of water.

FOR PREMIX SOLUTION:

Heavy Duty	Use undiluted
Medium Duty	1 part concentrated to one part water
Light Duty	1 part concentrated to 2-5 parts water

FOR USE THROUGH HIGH PRESSURE WASHER: Apply solution at a rate of 1 to a range of 30-100 depending upon soil conditions.

FOR HAND WASHING: Use solution at a rate of 2 to 4 ounces per gallon.

CAUTION: Keep out of reach of children. Do not store in freezing temperatures. Do not ingest. For eye or skin contact, flush with large amounts of water. If ingested, drink large amounts of water and acid fruit juices.
