A fast acting powerful powdered cleaner. Designed for use on concrete and unfinished wooden floors. Contains wetting agents and emulsifiers to aid in removing heavy grease and oil deposits. Cuts through grease and grime that strong alkalies alone fail to remove.

DIRECTIONS:

Either of two methods can be used to clean with this product, depending upon which is more convenient for the particular job involved.

- (1) Wet the surface to be cleaned, then sprinkle product over the area. Allow wetting material to soak on the floor for 5-10 minutes then scrub with long-handled stiff brush. Rinse the floor thoroughly with clean water and allow to dry.
- (2) Prepare a solution in a mop bucket and spread this solution on the floor using a brush or mop. Determine the strength of the solution by estimating the amount of soil on the floor. Allow this solution to soak on the floor 5-10 minutes, then scrub with a long-handled stiff brush. Rinse the floor thoroughly with clean water and allow to dry.

CAUTION: Irritant to skin and eyes. Harmful if swallowed. Keep out of reach of children. Wear protective clothing to avoid contact with skin, eyes and mucous membranes. If swallowed, drink several glasses of water followed with citrus juices. Call physician immediately. Dispose of container in an authorized landfill site or bury in a safe place. Do not contaminate water, food or feed by open dumping of contents.
